---

## SUMMARY

Computer Science undergraduate with strong foundations in Java, C++, Data Structures & Algorithms, and backend development concepts. Experienced in building Java-based applications and problem-solving through projects, hackathons, and machine learning coursework. Interested in software development and scalable backend systems.

---

## PROJECTS & EXPERIENCE

- Participated in multiple physical and online hackathons collaborating in team-based problem solving.
- **Ticket Booking System:**
  - Developed a Java-based railway reservation system enabling ticket booking, cancellation, seat availability checks, and passenger management.
  - Implemented OOP principles, Java Collections, JDBC, and exception handling for modular and efficient data management.
  - Technologies Used: Java, OOP, Collections Framework, File Handling / MySQL, JDBC, Exception Handling
- **Text Writing Analyzer:**
  - Developed a web-based tool to analyze textual input
  - Implemented tone/sentiment feedback (positive, negative, neutral)
- **AutoCodex :**
  - Designed a conceptual Python script generation system focused on accessibility and minimal-input coding workflows for disabled users.
  - Focused on automation and minimal-input coding workflow.

---

## CERTIFICATIONS

- Google IT support Certificate
- IBM - Cloud Fundamentals
- Introduction to Machine Learning - NPTEL
- Marketing Analytics - NPTEL

---

## EDUCATION

### B.Tech in Computer Science & Engineering

VIT Bhopal University, Sehore (M.P.) | CGPA: 8.07 | 2023 – Present

### Higher Secondary (Class XII)

Eminent Heights Public School, Vidisha (M.P.) | MP Board | 73.8% (PCM) | 2021–2023

### Secondary (Class X)

Vatsalya Sr. Sec. School, Vidisha (M.P.) | CBSE | 84.2% | 2021

---

## TECHNICAL SKILLS

- Languages: Java, C++, Python
- Frameworks & Tools: Spring Boot, JDBC
- Core Concepts: Data Structures & Algorithms, OOP
- Web: HTML, CSS, JavaScript
- Other: Fundamentals of AI & ML
